

# CyberWatch

## **DO NOT email confidential information**

- Confidential **Patient Health Information (PHI)** is **NOT** to be sent over the internet even if your facility has signed documentation from your patients.
- Everything sent over the internet is open to be captured by others, who are unauthorized to see what is being transmitted.
- The Network 14 office is required to report to CMS the sender of all emails received containing PHI.
- For helpful information concerning internet security go to:

<http://csrc.nist.gov/publications/nistpubs/800-66-Rev1/SP-800-66-Revision1.pdf>

**DO NOT e-mail confidential information!**
