

HOME THERAPIES: A VIABLE OPTION

Free CE through this interactive webinar

The ESRD Network of Texas (Network 14) in collaboration with the Advanced Renal Education Program (AREP) invites you to join an interactive learning experience focusing on home dialysis therapies. This webinar will discuss the use of home dialysis as a viable option, explain important factors to consider when choosing between different home modalities, and discuss components that will contribute to a successful home dialysis program. This education program is approved by the California Board of Registered Nursing, Provider Number 7570.
