

BE SAFE!

**ALWAYS KEEP YOUR
ACCESS SITE UNCOVERED!**

IT COULD BE A MATTER OF LIFE OR DEATH.

Staff need to be able to see that:

- Bloodlines are connected
- Needles are secure and in place
- No blood is leaking from site
- Tape is secure
- There is no tugging on lines

**IF YOU ARE
FEELING COLD...**

**Cover up - except for your
needles and connections.**

- Wear gloves / mittens
- Wear hats / scarves
- Wear extra sweater / heavy socks
- Dress in layers
- Use blankets
- Ask your staff for other ideas to keep warm
