

How to Add PPM measures into NHSN

STEP ONE:

The first step is to add a reporting plan. Select the month, year and location then check off the four required audits (HH, CATHCON, CATHCARE, DISINFECT).

The screenshot shows the 'Add Monthly Reporting Plan' interface. On the left is a navigation menu with options: NHSN Home, Alerts, Reporting Plan (selected), Patient, Event, Summary Data, Import/Export, Surveys, Analysis, Users, Facility, Group, and Logout. The main content area has a header 'Add Monthly Reporting Plan' and a 'Print Form' link. Below the header are fields for: Facility ID (dropdown: PRB Dialysis Test Facility 3 (ID 22077)), Month (dropdown), and Year (dropdown). There are two tables for selecting measures. The first table, 'Events', has columns for Locations, Dialysis Event (DE), and Central Line Insertion Practices (CLIP), with checkboxes for each. The second table, 'Prevention Process Measures', has columns for Locations, Hand Hygiene (HH), HD Catheter Connection / Disconnection (CATHCON), HD Catheter Exit Site Care (CATHCARE), AV Fistula / Graft Cannulation / Decannulation (FGCANN), Dialysis Station Routine Disinfection (DISINFECT), and Injection Safety (INSAFE), each with a checkbox and a note like '(a: 30)'. Below these tables are checkboxes for 'Patient Vaccination' (Influenza Vaccination Dialysis Patients (FLUVAXDP)) and 'Not Participating in NHSN this Month'. Action buttons 'Add Row', 'Clear All Rows', and 'Copy from Previous Month' are present for each table.

STEP TWO:

The second step is to Add Summary Data; from the dropdown menu select Prevention Process Measures.

The screenshot shows the 'Add Dialysis Summary Data' interface. The left navigation menu is the same as in the previous screenshot. The main content area has a header 'Add Dialysis Summary Data' and a 'Summary Data Type:' dropdown menu set to 'Prevention Process Measures'. Below the dropdown are 'Continue' and 'Back' buttons. A secondary dropdown menu is open over the 'Summary Data' menu item, showing options: Add, Find, and Incomplete.

STEP THREE:

The third step is to select the location; month and year, then enter your audits for each prevention process measure.
