

# Going Back to You!

## Promoting Home Dialysis and Transplant

Jul, 2020

Why don't you want to do home dialysis?

You might have a fear like the one described below...

### Home Hemodialysis

➤ *I am afraid to insert needles by myself...*

😊 Many patients have learned how to self-cannulate (insert their own needles) both for in-center and home dialysis. You can do it, too!

### Peritoneal Dialysis

➤ *I will get an infection...*

😊 Very low rates of PD infections are possible when close attention is paid to the causes of peritonitis (an infection of your abdomen), along with training provided to patients on the procedures used to reduce the risk of infection.

### Home Dialysis General

➤ *I would not have any experts to help me at home...*

😊 You will learn to be an expert! And the clinic will have 24 hour phone back up. You will always have access to help!

**\*\*\*Ask your team to provide you with this month's handout to overcome your fears, concerns, or barriers!**

**Ask any questions of your treatment choice to "Modality Expert Team (MET)" today!**
