

# Going Back to You!

## Promoting Home Dialysis and Transplant

Sep, 2020

**Are you experiencing down time after each dialysis treatment?**

Fact: Many in-center Dialysis patients experience two to six hours of recovering time from regular 3 times / week dialysis treatment

- **If you do more frequent dialysis at home (either Peritoneal Dialysis everyday or Home Hemodialysis more frequently than in-center), you don't have as much down time compared to transitional in-center Hemodialysis!**

Fact: Many Home Dialysis patients experience quicker recovery or no downtime after each dialysis treatment!

*\*\*\*Ask your team to talk to Home Dialysis patients to learn their experience and difference between In-center and Home Dialysis!*

Ask any questions of your treatment choice to "Modality Expert Team (MET)" today!
