Wear ORANGE on World Kidney Day - March 14th!

Help raise awareness of chronic kidney disease.

Each year, kidney disease kills more people than breast or prostate cancer.

CMS and the ESRD Program invite you to be a part of a national campaign focusing on kidney health. To show your support, consider one of the following activities on March 14th (World Kidney Day):

- Wear an orange shirt, pants, dress, shoes, hair, etc. (be creative)
- Take a selfie or picture of you in your orange gear #WorldKidneyDay
- Post your picture and short statement to your Facebook page; Make your post public and use #NationalKidneyMonth #Medicare
- Share information on your Twitter account about why all Americans should ask their doctors for a kidney checkup; Use #NationalKidneyMonth #Medicare

Have fun with your posts and Show that you care!

Share your #NationalKidneyMonth pictures on March 14th.
